Quality and Environmental Policy

Our customers and contractors are the focus of our work as well as the fulfilment of their needs and expectations.

The BMS company policy always commits everybody to strive for continuous improvement of company processes and procedures.

Our goal is to gain the trust of our customers and contractors and to deepen it through

- recording their needs and wishes,
- clarifying all open questions,
- on time delivery,
- services rendered in a traceable and error-free manner,
- fast execution of necessary changes and adaption,
- Fulfilment of environmental standards for all products and the subcontracted production,
- Fulfilment of all national and international legal and environmental regulations as well as requirements of maritime class societies. In addition, we are striving to enhance the basic standards in terms of quality and environment.

Becker Marine Systems has a high innovation potential to develop new systems and products to improve energy efficiency and emission reduction of the global maritime shipping continuously. With the Becker Mewis Duct[®] and the LNG Hybrid Barge HUMMEL outstanding emission-reduction systems have been developed.

Becker Marine Systems ensures

- an effective, adaptive organisation,
- clearly defined work flow and assignment of responsibilities,
- qualified employees and their continuing education,
- effective means and methods,
- the support of the employees in eliminating recognised deficiencies,
- safe and supportive working conditions,
- the monitoring of the effectiveness of the management system on a regular basis.

Every staff member is responsible for the quality and the environmental effects of their work and

- works according to the principle of traceability,
- checks their work results based on pre-determined requirements,
- corrects mistakes on his/her own or makes sure that detected mistakes and deficiencies are eliminated,
- is active in improving the quality of our equipment and the management system,
- is jointly responsible to follow environmental requirements and tries to avoid negative environmental impacts wherever possible.

	Certificate No. 245395-2017-AQ-GER-DAkkS	Rev. P

In addition, we are committed

- to contribute with our developments and products to emission reduction and energy efficiency in order to protect the environment and reduce carbon emissions.
- to reduce the environmental impact at our sites by modern infrastructure and efficient company cars. Possible further impacts shall be identified in advance and reduced.

The company objectives derived from the company policy are regularly defined within the company planning process. The company policy is reviewed by the management to ensure appropriate effectivity and efficiency. It is the guideline for all employees. The management is responsible to communicate the company policy and ensures understanding, commitment and implementation.
